

MAXI TRACTION 65

MAXIMUM TRACTION,
MAXIMUM LIFE

Firestone

www.firestone.eu

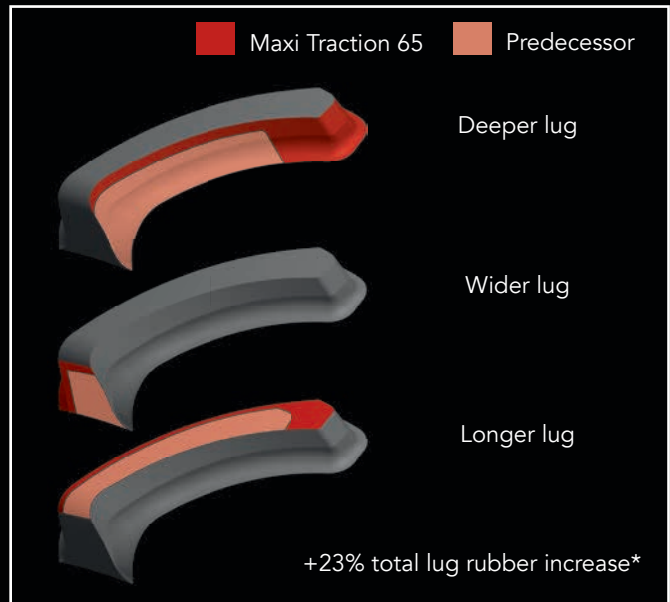

Longer tyre life

thanks to new lug design

The new Firestone Maxi Traction 65 is engineered to last longer while delivering excellent performance throughout its entire life cycle. It does so thanks largely to its **11% deeper lugs**.

Its **9% wider lug** and wider tyre width provide more ground contact, extending its tyre life, while its **24% longer lug** and increased lug overlap result in reduced tyre wear while on the road, thus increasing the life of the new Maxi Traction 65 even further.

In short, the new lug design provides outstanding tyre life and reliability for a lower cost per hour.

*size 650/65R38

Excellent traction

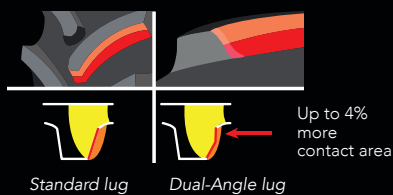

thanks to patented Dual Angle Lug Design

Featuring Firestone's unique patented Dual Angle Lug Design, the Maxi Traction 65 provides reliable, steady performance boosting traction by at least 4% versus standard agricultural tyres.

Combined with an extra-long lug, a larger contact patch and efficient self-cleaning action, the tyre lets you cover more ground, faster and more economically.

Dual angle lug design

For greater traction up to 4% compared to standard agricultural tyres in a wide range of conditions.

Increased driver comfort

thanks to its longer and overlapping lug*

The tyre's longer and overlapping lug also provides better driver comfort on the road.

*Compared with its predecessor.
